This application contains claims directed to the following patentably distinct species of the claimed invention: Group 1, a device as disclosed in claim 19 wherein "cable ties" are used as post securement means. Group 2, a device as disclosed in claim 17, wherein "a block having two vertically extending channels is used as a post securement means. Group 3, a device as claimed in claim 48, wherein a "U-bolt" is used as a securement means for post. Group 4, a device as disclosed in claim 23, which uses wing clamp as a means to secure post. Group 5, a device as disclosed in claim 24 which uses pipe clamps as a means to secure post. In addition once applicant chooses one of the above post connection means the applicant must select between a means of fastening a net to post means between the sleeves of claim 46 and winding strap as disclosed in claim 5.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, No claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Richard Polley on 9-30-03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication should be directed to Jerome Donnelly at telephone number 308-2668.
